

# UreFlex<sup>®</sup> PRO

## SEMI-SELF-LEVELING POLYURETHANE HYBRID SEALANT

### BUILT FOR REPAIRS IN COLD, WET & DEMANDING CONDITIONS.

UreFlex Pro is a professional-grade, semi-self-leveling polyurethane hybrid sealant packaged in a 3.5-gallon pail, engineered for commercial roof repairs and maintenance. Designed to perform where many sealants fail, UreFlex Pro delivers reliable adhesion, flexibility, and durability—even in challenging conditions.

### WHY CONTRACTORS CHOOSE UREFLEX PRO

#### Exceptional Flexibility

Engineered to move with the substrate, accommodating expansion and contraction without splitting, cracking, or losing adhesion.

#### Cold-Weather Application

Formulated for use in colder temperatures, extending the repair season and reducing downtime when conditions aren't ideal.

#### Adheres to Damp or Wet Surfaces

Can be applied to damp or wet roof substrates, making it ideal for emergency repairs and maintenance situations where drying time isn't an option.

#### Bonds to Silicone

Engineered to adhere to cured silicone sealants, allowing repairs and tie-ins where most repair products will not bond.

### DESIGNED FOR COMMERCIAL ROOF REPAIRS

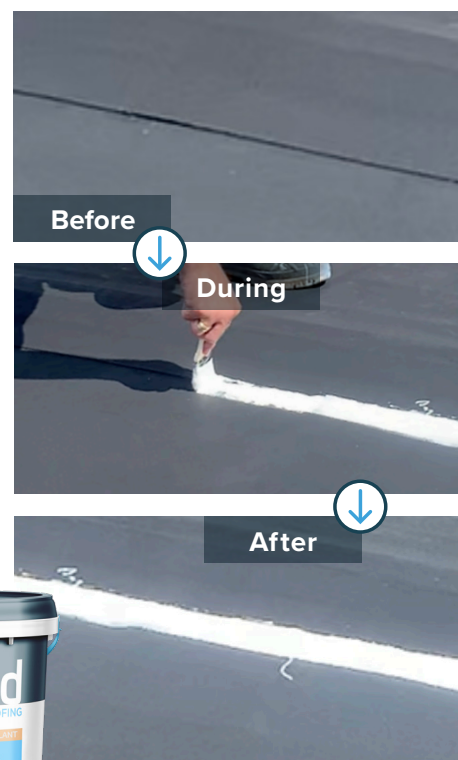

#### UREFLEX PRO IS IDEAL FOR:

- Maintenance and emergency roof repairs
- Seams, laps, and transitions
- Penetrations and flashing repairs
- Ponding-area repairs (non-traffic)
- Repairs over existing silicone

Its semi-self-leveling nature allows the material to settle into defects, creating a continuous, watertight repair once cured.

### BUILT FOR REAL-WORLD ROOFING CONDITIONS

UreFlex Pro provides the strength, flexibility, and adhesion contractors expect from a polyurethane hybrid sealant, making it an excellent choice when flexibility and durability are the priority. ***When the roof can't wait, UreFlex Pro gets it sealed.***

# FIBERFLEX® PRO

Fiber-Infused Polyurethane Hybrid Sealant  
Seal. Repair. Reinforce.

**PROFESSIONAL-GRADE SEALANT ENGINEERED TO FILL CRACKS, BRIDGE GAPS & MAKE LONG-LASTING REPAIRS ACROSS VIRTUALLY ANY SURFACE.**

## BUILT FOR DEMANDING REPAIRS

FiberFlex Pro is a high-performance, fiber-infused polyurethane hybrid designed for contractors who need a reliable sealant that does more than just fill a joint. The integrated fibers help reinforce repairs while maintaining the flexibility needed to handle movement, expansion, and contraction.

From crack sealing to detailed repairs, FiberFlex Pro delivers strong adhesion, easy tooling, and long-term durability—indoors or out.

## KEY BENEFITS

### Bonds to Silicone

Adheres to cured silicone sealants where most products fail.

### Fiber-Infused Reinforcement

Helps bridge cracks and gaps while creating a reinforced repair.

### Flexible & Durable

Designed to move with the substrate without splitting or pulling away.

### Multi-Surface Adhesion

Bonds to concrete, masonry, metal, wood, EIFS, stucco, roofing materials, and more.

### One-Product Solution

Seal, repair, and detail with a single professional-grade sealant.

## APPLICATIONS

- Crack and gap sealing
- Repairs on walls, roofs, and transitions
- Penetrations and flashing details
- Interior and exterior applications

## PROFESSIONAL-GRADE RESULTS

Whether you're performing targeted repairs or sealing critical details, FiberFlex Pro delivers reliable performance, strong adhesion, and long-term durability—all from a single, fiber-reinforced sealant. **Seal it once. Trust it long term!**
